A. N. KANOUSE

Carole and Kathryn in Field of Narcissi

Greetings.. It is again our privilege to thank our many flower friends for the liberal orders and fine letters received since we have had the opportunity of sending you our little catalog of hardy bulbs. It is our earnest hope that the future will bring a continuance of these pleasant relations.

We greet, also, the many flower fans to whom our catalog of Spring Garden Beauties goes for the first time. We hope you will take advantage of some of the bargains offered herein.

We wish, particularly, to thank the many customers who have recommended us to their friends; and trust our bulbs will be a credit to themselves in your gardens, and that they will create a colorful picture that will long be enjoyed.

The production of high quality bulbs is an art requiring long experience and considerable skill. To this art we have devoted all of our energy for the past seventeen years. It has been a labor of love and we expect to continue in it for many years. Ours is a family enterprise, and all concerned are vitally interested in its welfare and the satisfaction of our customers. If an error is made we have no one to blame but ourselves and you will find we are always willing to rectify any mistakes. However, we have no control over conditions after the bulbs arrive at their destination. We will supply you with first class bulbs, free of disease, true to name, and guaranteed to arrive in good condition. From there you must carry on, and you will be surprised how simple a task it will be. Given good rich soil, deeply spaded, and a reasonable amount of care, you will be rewarded with a wealth of bloom.

PLACE YOUR ORDER EARLY, we fill them in the order received. After our final warehouse inspection by the State Horticulture inspectors, we start filling our orders about September 1st.

NO ORDERS ACCEPTED AFTER NOVEMBER 1st, at which date we complete our final plantings.

ALL PRICES QUOTED HEREIN ARE PREPAID EXCEPT WHERE OTHERWISE NOTED.

DEFENSE STAMPS—If you feel that you should buy defense stamps with those extra dollars you have been saving, instead of buying bulbs, go right ahead and buy the stamps and send them to us in payment for your bulb order. In that way Uncle Sam will have the money, you will have the bulbs, and we will have the stamps, which will promptly be turned into Defense Bonds. Nothing like spending your money where it will do the most good.

To all, we wish the best of all things, and especially that 1942 will see your flowers the finest ever.

Sincerely yours,

A. N. and MAUDE S. KANOUSE,
Carole and Kathryn.

HYACINTHS

The most natural, truly graceful Hyacinth plant is produced from medium or small sized bulbs. Hyacinths lose grace and strength when they gain in size. The "Exhibition" size bulbs so commonly offered are not suited for outside planting. They produce large trusses that are far too heavy for the stem to hold upright, and the first wind or rain lays them flat on the ground. This year we are offering only one size bulbs, which are ideal for outdoor culture but not recommended for pot culture or forcing. These bulbs will produce elegant, graceful blooms in the garden and will increase in size each year.

MIXED HYACINTHS. Stock of all hyacinths is becoming very scarce here in the United States, and we sold out on many named varieties last season so that all we can offer this year are mixed colors. This mixture will include several shades of blue, cream, white, and some pink. A good mixture, but mixed colors only. **Each 35c; doz. \$3.50.**

CANDIDUM LILY

CANDIDUM LILIES

CANDIDUM LILIES (Madonna). For several years we have been growing a very nice strain of these lilies, and they have proved very resistant to disease common to this variety. The Candidum is widely grown, and a very beautiful lily. It blooms in early June and July, having tall stately spikes of pure white blossoms, deliciously fragrant. Should be planted in early fall, in a well drained situation. Plant shallow, the tops of the bulbs not over 2 inches below the surface, and should be left undisturbed for years. **ORDER EARLY.** No shipments of this lily after **SEPTEMBER 15.**

DAFFODILS

In Pots or Boxes

As soon as bulbs are received, pot them in a good loamy soil, adding a little sand or leaf-mold and about a tablespoonful of bone meal per pot. Old pots should be washed thoroughly and allowed to dry before using. New pots should be soaked. Provide drainage by placing pieces of charcoal or fragments of broken pots over the drainage hole. A little ground peat in the bottom regulates drainage, retaining moisture.

After the bulbs are planted in the pots, bury pots outdoors in a hole in the ground for ten to twelve weeks, then they may be removed indoors for flowering. Select the earliest varieties first, thus extending the flowering season.

Do not bring them into a warm temperature; 50 to 60 degrees is best at first. Do not give any bottom heat. Later when the flower buds are well advanced the temperature may be increased to not more than 65 degrees.

When the pots are first brought to the light, the tender shoots may be covered for a day or two with an inverted flower pot to prevent injury from light or drafts. A little weak liquid manure once a week, until buds burst, will hasten the flowers after growth has started. Always have plenty of light and air.

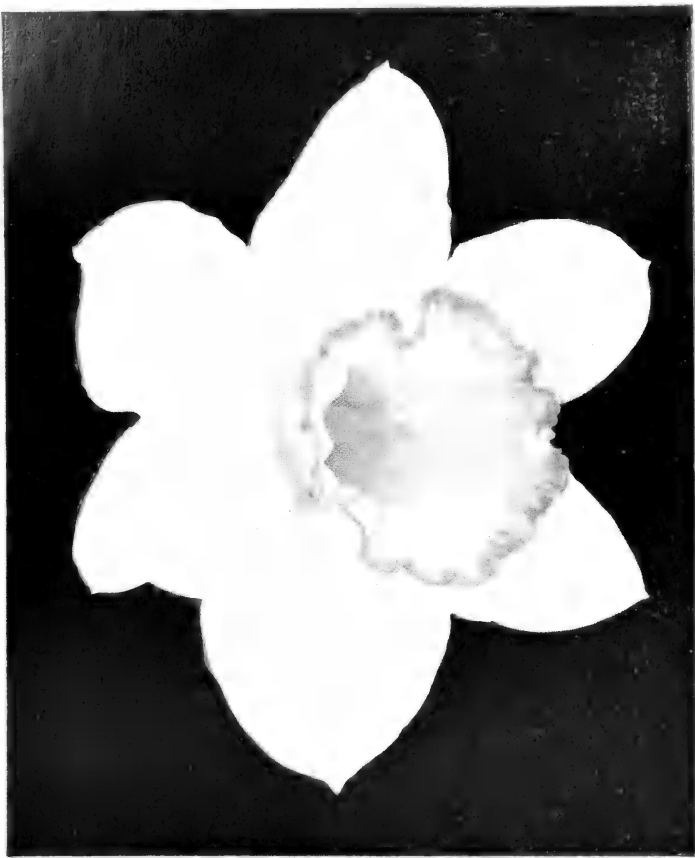

It's a real pleasure to have daffodils blooming indoors in January or February.

NARCISSUS — DAFFODILS — JONQUILS

The terms "Narcissus" and "Daffodils" are interchangeable; there exists a tendency to apply the name "Daffodil" to the varieties in which the trumpet or crown is as large or larger than the petals (perianth); while the name "Narcissus" is usually used for the varieties having small cups or crowns. Jonquils are also a type of Narcissus; they usually bear their flowers in clusters and have rush-like foliage. Many of the Jonquil Hybrids have only the single flower and ordinary foliage. The name "Narcissus" is correct for any or all of the different types.

A Few Suggestions for Growing Daffodils

They will thrive in any well drained garden soil. Prepare the soil deeply, 12 inches or more is best. Plant at least 6 inches deep, extra large bulbs are better planted 7 or 8 inches deep. (Some varieties make larger bulbs than others.) No manure should come in contact with the bulb. If the soil needs fertility, use bone meal at the rate of one-fifth pound to the square yard. This should be thoroughly mixed with the soil under the bulb.

A mulch of straw or leaves will be beneficial in very severe climates. If the mulch is applied after the first freeze, it will prevent thawing and heaving.

A BOWL OF ENGLISH IRIS

English Iris

If you have never grown this beautiful Iris, try a few bulbs; you will be delighted. They thrive in any ordinary garden soil, multiply very rapidly, and are unexcelled for cut flowers. They bloom in late June and early July. Need some protection in severe climates. Plant about 4 inches deep, during September. Or all the bulbous Iris, these are our favorites. A bouquet of these lovely flowers will be found as strikingly beautiful in color as many of the sumptuous orchids. Make lovely corsages.

FASCINATION. Delicate orchid color. **Doz. \$1.**

KING OF BLUES. Deep velvety blue, sometimes flecked darker. **Doz. \$1.00.**

MIXED. A mixture of various colors, including lovely orchids, light blue, dark blue, medium blue, purple, etc., all beautiful beyond description. **Doz. 75c.**

For a number of years we have been selecting different colors in our seedling English iris, and now we have enough stock of separate colors to give our customers some outstanding colors and combinations. These have not been named, so we can list them by color only, but they are all very fine and worth a trial in any garden.

Following varieties of English iris all **\$1.00 doz.**

FRECKLES. White speckled with violet.

ORCHID. Lovely color, beautiful for corsages.

LIGHT BLUE. Clear light sky blue. Lovely.

MEDIUM BLUE. Porcelain blue, tall.

DARK BLUE. Very deep, velvety blue, like rich velvet; darker than King of the Blues.

DUTCH IRIS

(Illustrated on Back Cover)

This group of Bulbous Iris is of recent introduction. They are very superior to the old Spanish types; having more substance, bloom earlier, and stems are longer. The brilliancy and purity of color of these orchid like flowers is unsurpassed. As cut flowers they remain in good condition for a remarkable length of time, and in the garden have a blooming range of about six weeks. Although they are very hardy, a mulch will be beneficial in extreme climates. Plant 5 inches deep.

Numbers in parenthesis used in descriptions represent time of blooming, (1) being earliest and (7) the latest; 24" equals height in inches.

DUTCH IRIS, 50c per dozen.

A. BLOEMAARD. (2) 20" Standards dark purplish blue, falls lighter blue. Very large flowers.

IMPERATOR (Filifolia). (5) 22" Fine uniform blue. The best late blue for forcing, very strong grower.

JAN WEENIX. (Morning Mist) 30" Standards and falls soft lavender blue. Extra fine and tall.

LEONARDO DA VINCI. (4) 28" Standards creamy white; falls canary yellow with orange stripe. Very attractive large flower.

POGGENBEEK. (3) 30" Standards and falls uniform dark blue.

S. DE VLIET (Blue Horizon). (3) 27" Standards light violet blue; falls soft sky-blue, narrow orange stripe, large beautiful flower.

THERESA SCHWARTZ. (4) 24" Standards pale cornflower blue, falls pure white, with narrow orange stripe.

WEDGEWOOD (Tingitana Hybrid). (1) 24" About two weeks earlier than the regular Dutch Iris. Semi-hardy, and unexcelled for forcing. Standards medium blue, falls lighter blue. **Doz. 60c.**

WHITE EXCELSIOR. (3) 22" Uniform pure white, falls very broad with yellow stripe.

W. VERSCHUUR (Indian Chief). 22" Standards violet tinged bronze, falls bronze. Excellent novelty.

W. ZUIDERVELD (Violet Queen) (4) 20". Standards and falls uniform light bluish violet, very large flower of fine proportions.

YELLOW QUEEN. (3) 28" Clear golden yellow. Unexcelled for cutting.

Will soon reach my 72nd milestone, but as long as I can scratch around I intend to have flowers growing and blooming. You people have been especially considerate and courteous to me and I appreciate it, that's why I am writing this letter to you and Mrs. Kanouse, and inclosing a little photo of our home."

IRIS RETICULATA (Species Iris)

The violet scented iris, flowering outside in February. Brilliant deep violet-purple flowers with golden yellow blotch in falls. Grows 6 to 8 inches tall and has the fragrance of a bunch of violets. Hardy with reasonable protection. **Each 20c: 6 for \$1.00.**

SPANISH IRIS

Spanish Iris blossoms are the same general shape as the Dutch Iris, but these bloom later than the Dutch, thus giving a longer iris blooming period.

GOLDEN LION. (7). 26 inches. These perfectly beautiful ruffled yellow flowers are in a class all their own. Without a doubt it is the finest Spanish Iris and as large as any of the Dutch and more ruffled. The standards are lemon yellow; falls, beautifully ruffled, are golden yellow. Fine keeper as cut flower and makes a grand showing in the garden. **Dozen 75c.**

CAJANUS (7) 30" Large golden yellow flower on very tall stems. One of the finest for the garden and a splendid cut flower with wonderful substance. **Doz. 50c.**

SUMMER . . . by Betty Knowles

*Look at a garden and love the world,
Breathe the fragrance of summer air,
Touch the heart of a flower uncurled,
Lie in the grass and say a prayer,*

*Sway to the music of bending trees,
Wade in the rush of a hidden brook—
Secrets of happiness lie in these
If only you open your heart and look!*
